

Customized Automation for Liquid & Solid Sample

Sample Handelling for:

- Elemental Analysis
- Color Analysis
- Raman Analysis
- Particle size Analysis

Automated Analysis in your Process

Sample Type

- Solid
- Liquid
- Slurry
- Pallets
- Films
- Pipes
- Billet sample

Automated Solution for

Environmental

Metals

Food Research

Mining

Petrochemicals

Pharmaceuticals

Autoscan technology is built to perform in harsh situations with extremely corrosive chemicals.

For Liquid Samples

Realtime elemental analysis in liquid, affluent analysis in petrochemicals. uninterrupted functioning and no effect of the external environment on the performance and outcomes of the analysis.

For Solid Samples

Online Billet Analysis

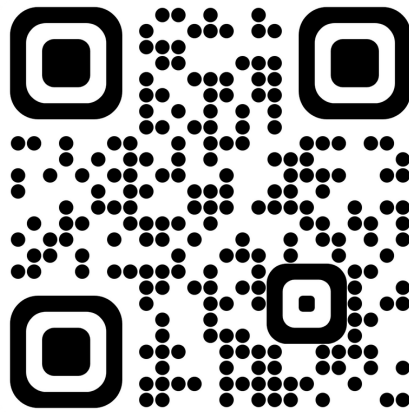

Online Film Analysis

Solutions for real-time solid sample analysis for a variety of parameters are offered by Autoscan. Its cutting-edge technology makes it possible to take samples from the belt or, from the stack.

Unique Features

- Application for solid & liquid sample for multiple parameters.
- Real-time results.
- Cutting edge liquid flow cell technology for highly repeatable result.
- Capable of Interface with Manufacturing execution system.
- User interface for easy operation and Maintenance.
- Remote Monitoring and execution with service support.
- Robust system which can work in high corrosive environment and Automated ,Fast, Simultaneous auto-sampling of liquid.
